

How to: Create an Automation Protocol

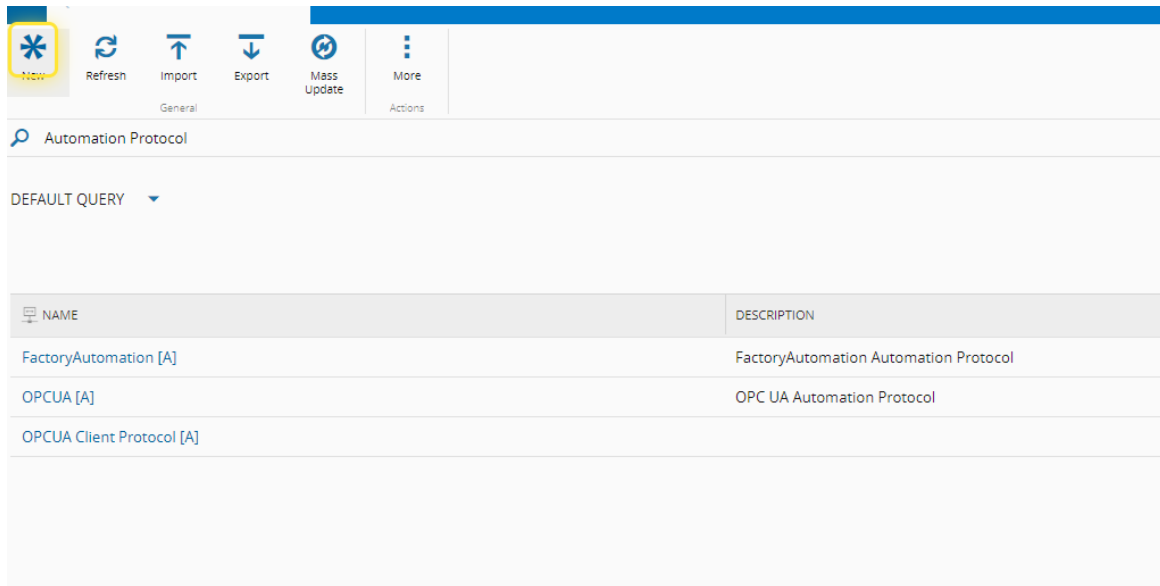

1. Go to the Business Data menu.

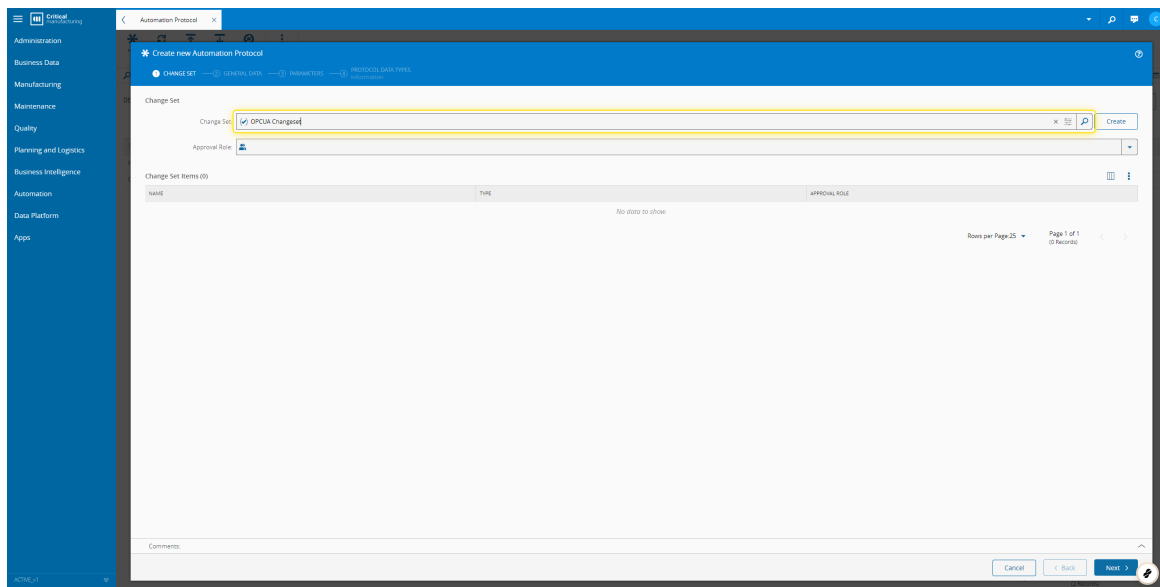

2. Select The Automation Protocol tile

3. Select New

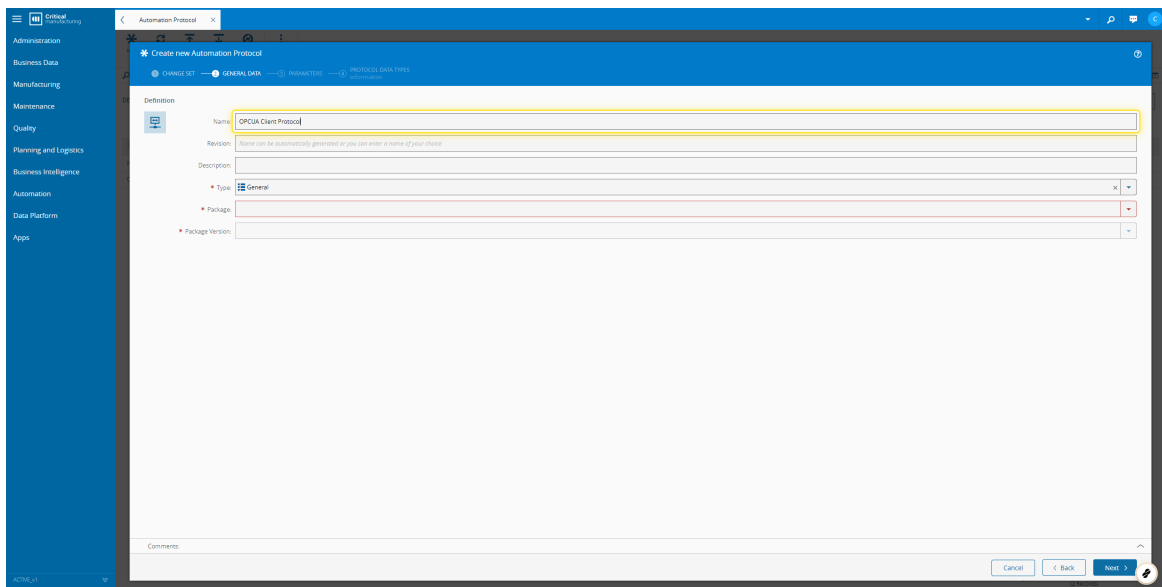

4. Add a ChangeSet

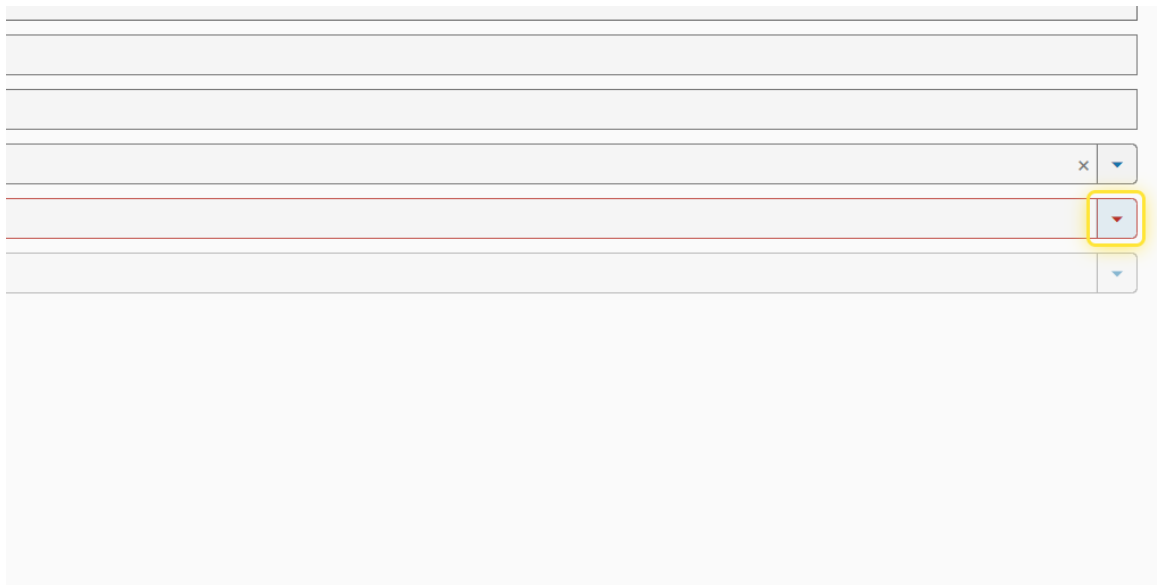

5. Select Next

6. Provide a Name for your Automation Protocol

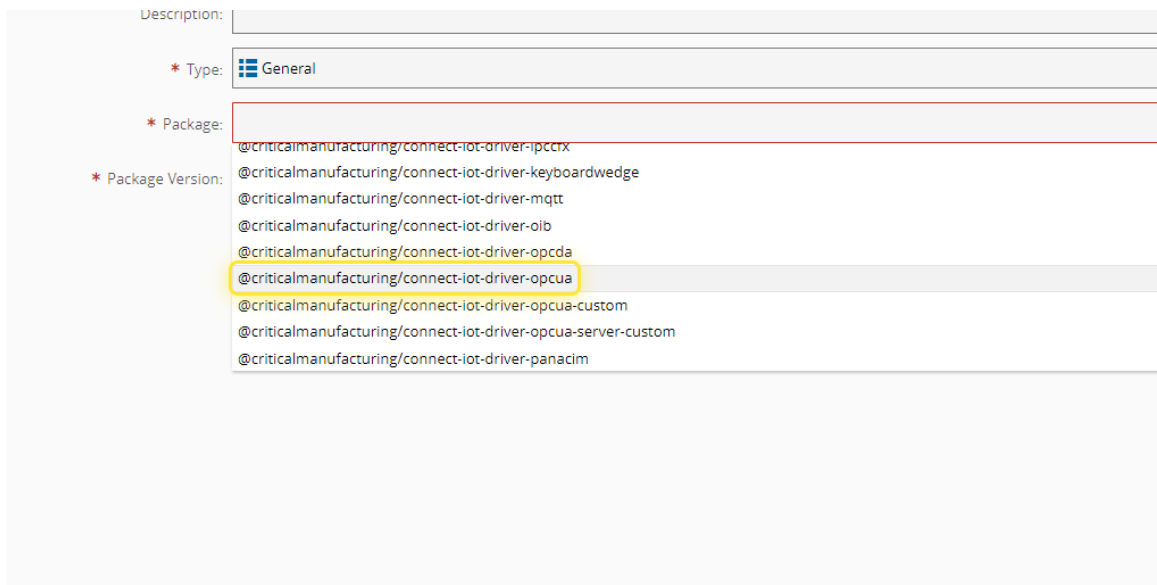

7. Select the Driver package that you depend on

A screenshot of a software interface showing a list of items. The list consists of several rows, each with a small dropdown arrow on the right side. The second row from the bottom has its dropdown arrow highlighted with a yellow box.

8. Select @criticalmanufacturing/connect-iot-driver-opcua

A screenshot of a software interface showing a dropdown menu. The menu is open, displaying a list of package versions. The option @criticalmanufacturing/connect-iot-driver-opcua is highlighted with a yellow box.

Description:

* Type:

* Package:

* Package Version:

- @criticalmanufacturing/connect-iot-driver-ipcctx
- @criticalmanufacturing/connect-iot-driver-keyboardwedge
- @criticalmanufacturing/connect-iot-driver-mqtt
- @criticalmanufacturing/connect-iot-driver-oib
- @criticalmanufacturing/connect-iot-driver-opcda
- @criticalmanufacturing/connect-iot-driver-opcua
- @criticalmanufacturing/connect-iot-driver-opcua-custom
- @criticalmanufacturing/connect-iot-driver-opcua-server-custom
- @criticalmanufacturing/connect-iot-driver-panacim

9. Select the desired package version

Create new Automation Protocol
