 Confidential: No

CHILD ENTRIES

Entries (1)

PATH
/Cmf/System/Configuration/

7. Select ConnectIoT

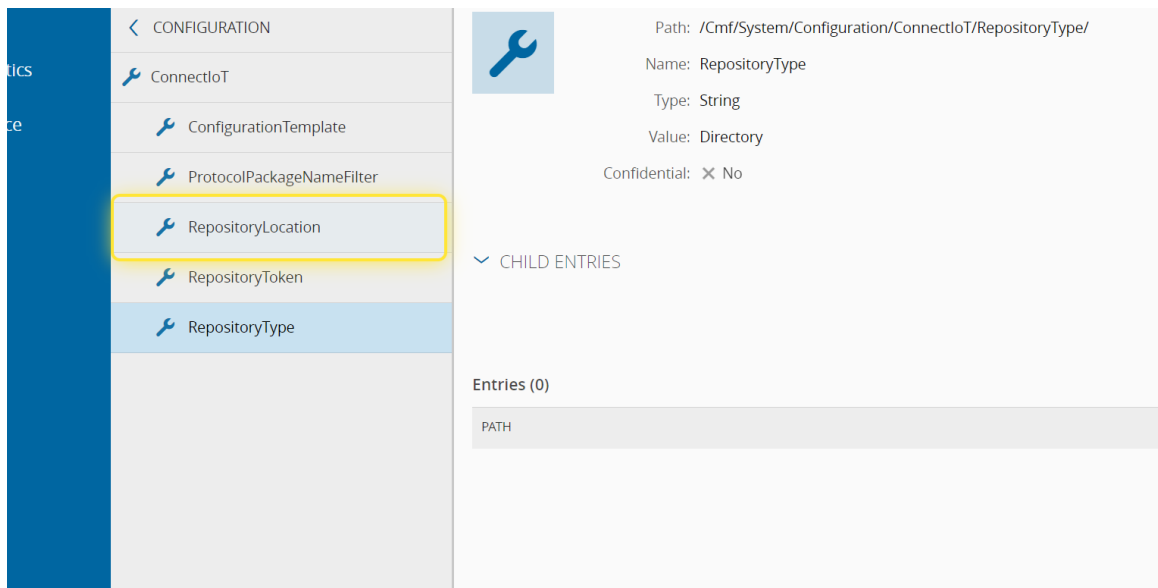

8. Select RepositoryType

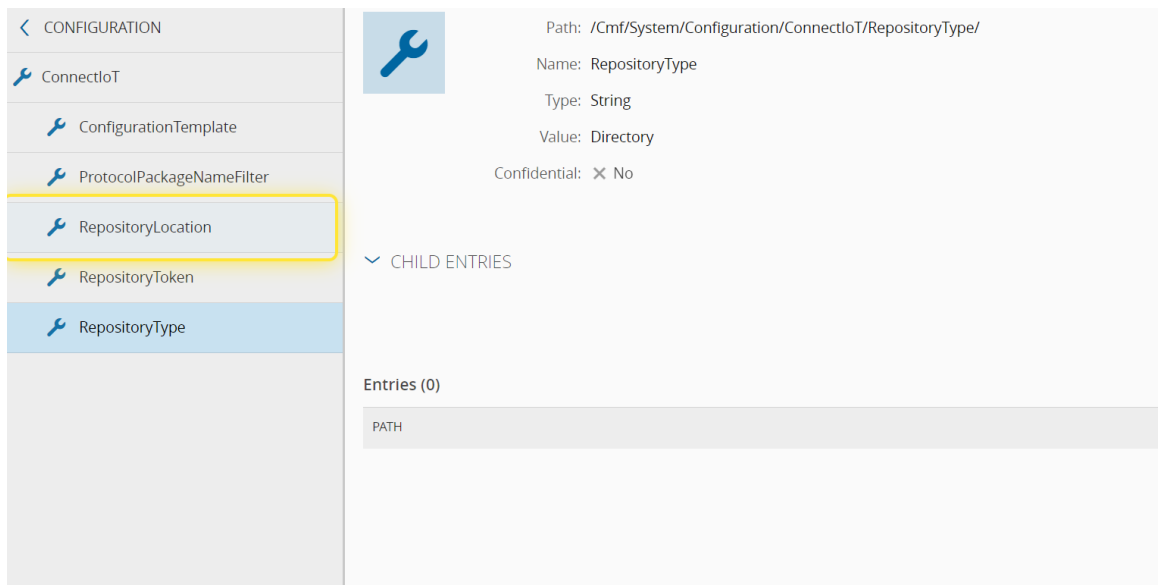

9. Set the Repository Type

The repository type settings can be either a **Directory** or **NPM**

10. Select RepositoryLocation

11. Set either the NPM URL or the path to the Directory

The screenshot displays a web-based configuration management interface. At the top, there is a navigation bar with a hamburger menu, a search icon, and a close button. Below this, a toolbar contains icons for Refresh, Create, Edit, and Remove. The main content area is titled 'CONFIGURATION ENTRIES' and shows a tree view on the left with options like 'CONFIGURATION', 'Connecticut', 'ConfigurationTemplate', 'ProtocolPackageNameFilter', 'RepositoryLocation', 'RepositoryToken', and 'RepositoryType'. The 'RepositoryLocation' entry is selected, showing its details in a 'CONFIGURATION ENTRY' view. This view is divided into 'General Data' and 'Information' sections. The 'General Data' section includes fields for Path, Name, Type, Value, and Confidentiality. The 'Information' section shows creation and modification details. Below the entry details is a table for 'CHILD ENTRIES' which is currently empty. The interface also includes a search bar, a 'Display By' dropdown, and a 'Rows per Page' selector.
