7. Set up the Approval Role or Workflow to be used.

The screenshot displays the 'Edit Entity Type' configuration window for the 'ITEMS' entity. The interface includes a sidebar with navigation options like Administration, Low Code, Business Data, Manufacturing, Maintenance, Quality, Planning and Logistics, Business Intelligence, Automation, Data Platform, and Apps. The main configuration area contains several sections: 'ITEMS' with a 'Versioned' toggle; 'Allow Automatic Change Set' (enabled); 'Make Change Set Items Effective on Approval' (disabled); 'Change Set Name Generator' (ChangeSetNameGenerator); 'Approval' (Role selected); 'Role' (Administrators selected); 'Notify Requester' (DataOrchestratorAdministrators selected); 'Notify Approvers' (MES selected); 'Use Change Set Approval Context' (AppFrameworkApiAccess, CookieManager, Plant Manager); 'Enable Automatic Approval' (disabled); and 'Display Change Set on Clone' (disabled). A 'Comments' field is at the bottom. The dialog is titled 'Edit Entity Type' and has 'Cancel' and 'Save' buttons.

8. Select the Save button.
