Shortcut Overview

Keyboard shortcuts allow you to execute actions quickly by using key combinations, which helps reduce the number of steps needed to complete common tasks. Critical Manufacturing MES ships with pre-configured shortcuts that you can customize according to your permissions.

Shortcut Scopes

Shortcuts in the system are organized into two categories:

Scope	Applicable to	Purpose	Typical examples
Global Shortcuts	All users	Execute common actions across the system	Close a page, refresh a page, start a transaction, or sign out
User Shortcuts	Individual users	Personalize a user workflow with custom page access	Open a frequently used page or access a feature used regularly

Table: Shortcut Scopes

Default Shortcuts

The system includes a set of suggested shortcuts that you can review on the [Global Shortcuts](#) page.

Global Shortcuts (33)

Some examples from the default shortcuts are:

- `ctrl+3` dispatches and tracks in a material.
- `Alt+X+D` posts data in a data collection instance.
- `Alt+O+C` opens the **Barcode Identification** page.

You can define both global and user shortcuts, and you can also upload both through master data.
